PROJECTS

Medlinc | HTML/CSS, Bootstrap, JavaScript, Python, Django, Git, VS Code

 Github

- * Designed and implemented a web-based healthcare application that provides a comprehensive range of medical services on a unified platform.
- * Provides 3 distinct services: medical consultation, laboratory testing, and medical product delivery.
- * Offers essential services, including 24/7 emergency assistance (SOS).

Trendify | React JS, Node JS, Express JS, Mongo DB, Tailwind CSS, Framer Motion, JWT Tokens, Git, VS Code

 Github

- * The ecommerce application is built on the MERN stack, utilizing ReactJS for the front end with Bootstrap for the user interface. The backend is developed using Node.js, and MongoDB is used as the database.
- * This platform connects with hundreds of users and ensures 100% security through the implementation of JWT tokens for authentication and security purposes.

E-commerce | Next JS, Tailwind CSS, Sanity, Stripe, Git, VS Code

 Github

- * Led the development of an ecommerce web application, driving a substantial 35% boost in online sales for smart accessories. Successfully integrated and optimized features with Sanity CMS, resulting in a 20% increase in user engagement.
- * The system's functional aspect includes the capability to add an unlimited number of items to the cart.
- * To obtain administrative access to all products and essential components, we leverage the Sanity platform.
- * The payment system has been seamlessly integrated with Stripe for the purpose of conducting thorough testing.
